## Concrete Curing Racks ZI 2035

Standards:

Specification:

These durable racks are manufactured from plastic compounds and recycled materials to resist moisture, abrasion, chemical and temperature variations. Each rack has built-in handles, making them easy to carry and safely stacked 12 tiers (58") high. The racks unique open frame design allows water vapor to flow through and saturate the surface of each individual cylinder, and also separates and prevents cylinder surfaces from touching each other for improved temperature control.

Each rack holds 4 pieces 100 x 200 mm cylinders and is 17-5/8" wide x 6-3/8" deep. The weight of one rack with 4 cylinders is approximately 17 KG. One base rack is required for each stack.
