Cement Testing Equipment

Standards:

Specification:

Cement is the binder used to create concrete and mortar. The manufacture of cement requires stringent control and a number of tests are performed in cement plant laboratories to ensure that the cement is of the desired quality that conforms to the requirements of the relevant standards. The most important use of cement is the production of concrete and mortar, which are the combination of cement and an aggregate to form a strong building material that is durable in the face of normal environmental effects. The current Standards have drawn on the know-how of

the various national bodies in order to arrive at a unified Standard. Labtest manufactures vast range of Cement Testing Equipment & Machines that satisfy, practically all requirements.
